HuntVe

Quiet Power: HuntVe's 20 Year Journey to Redefine the Off-Road Experience

In the world of off-road adventure, power and endurance are often measured by noise and size. But for nearly two decades, HuntVe, a Fort Worth, Texas-based manufacturer of electric 4x4 UTVs, has proven that true strength can also be silent. Since its founding in 2006, HuntVe has earned a reputation for premium quality, durability, and innovation, building electric off-road vehicles that are as reliable as they are revolutionary.

Even today, HuntVe models built as far back as 2008 are still in use, a testament to their longevity and craftsmanship. That kind of staying power reflects the company's unwavering focus on quality, a value that has defined HuntVe from the start.

Built from a Vision of Silence and Strength

The origins of HuntVe stem from a unique demand in the hunting and outdoor community, the need for stealth and quiet performance in rugged environments. Founder Ben King recognized that traditional gas-powered vehicles disrupted the outdoor experience with noise and emissions. He saw an opportunity to create something different: an electric hunting vehicle that could deliver power without compromising silence.

“The origins of HuntVe come from a demand in the off-road hunting environment where silence and stealth are a premium,” King explained. The company’s name itself is a nod to its purpose, a shortened version of “hunting vehicle.”

When HuntVe entered the market, most competitors focused on mass production and lower costs, often at the expense of quality. King, however, took the opposite approach. His goal was to produce a vehicle that would stand the test of time and prove that electric UTVs could match, or even surpass, gas-powered models in performance and reliability.

Innovation That Lasts

Over the years, HuntVe has continued to refine its vehicles through advancements in motor technology, premium lithium battery systems, and electronic speed control. These innovations have resulted in off-road UTVs that deliver a smooth, quiet, and powerful ride across a range of terrains.

Each HuntVe is handcrafted in Fort Worth, Texas, and distributed through a growing dealer network across the United States. The company offers a variety of configurations, including two-passenger utility models, four-passenger crew vehicles,

***“The
company’s
name itself is
a nod to its
purpose”***

and flatbed designs, ensuring that every customer can find a model suited to their needs, from hunting and land management to trail riding and commercial use.

What truly sets HuntVe apart is its dual motor design, a feature rarely found in electric UTVs. While many competitors rely on a single motor system, HuntVe's dual setup provides enhanced torque, smoother power distribution, and superior durability. Combined with a four-wheel independent suspension, double wishbone front and rear systems, and a robust braking setup, HuntVe delivers performance equal to and often exceeding that of gas-powered alternatives.

Current models boast an impressive range of up to 75 miles on a single charge in off-road conditions, with an MSRP between \$24,000 and \$34,000 depending on configuration.

Milestones and Momentum

As HuntVe approaches its 20th anniversary in 2026, the company continues to evolve with the same innovative spirit that defined its beginning. Its upcoming product roadmap includes a new vehicle platform that will increase the top speed from 25 mph to 35 mph. Additionally, HuntVe will introduce HVAC and enclosed cab systems in early 2026, further enhancing comfort and functionality for year-round use.

Beyond product development, HuntVe is expanding its dealer network and offering new business tools, including floor planning and consumer financing programs, to help retailers better serve customers.

Joseph Cotten, General Manager of HuntVe, is optimistic about the road ahead. "We see a bright future and an increasingly strong demand for our product," he said. "We believe that the quality will carry us now and into the future."

powerful reminder that sometimes the strongest presence is the one you barely hear.

For more information, visit: www.huntve.com.

The Future of Quiet Innovation

From its early beginnings to its upcoming 20-year milestone, HuntVe has stayed true to its founding principles of innovation, quality, and sustainability. By combining American craftsmanship with cutting-edge electric technology, HuntVe continues to lead in an industry that's rapidly evolving toward cleaner, more efficient mobility.

In a market often defined by horsepower and volume, HuntVe has built its legacy through endurance and quiet confidence. Its vehicles don't just move through the outdoors, they blend with it, offering a

Man accused in deadly 2022 golf cart crash receives higher bond after recent arrests

Michael Marlowe and two of his children were killed in the June 2022 crash in Statesville. Austin Ray Harmon, 26, faces multiple charges.

IREDELL COUNTY, N.C. — A man facing charges for a crash that killed three people on a golf cart in 2022 is back in jail after his bond was increased.

Austin Ray Harmon's bond increased to \$750,000 after a hearing on Tuesday. Harmon, 26, posted a \$310,000 bond after the deadly crash but was again arrested in 2025, leading to the bond increase.

Harmon faces charges of felony death by vehicle, serious injury by vehicle, and driving while intoxicated for a crash that left three people dead. The crash happened on Fort Dobbs Road in Iredell County on June 13, 2022.

Investigators said Harmon's Honda Accord crossed the center line and struck a golf cart head-on. Michael Marlowe, 39, and his son Bentley Marlowe, 5, were killed in the crash. Jada Marlowe, 13, Michael Marlowe's daughter, died 13 days after the crash.

Only one of the people on the golf cart, a daughter of Marlowe's, survived the crash.

Harmon was arrested and charged but later released after posting bond.

In 2025, Harmon has been arrested for drug paraphernalia possession and traffic infractions in Iredell County and defrauding an inkeeper and trespassing in Rowan County. He has court dates in December for each incident.

Harmon is once again in Iredell County custody after these incidents and now faces a much higher bond. His next court date for the deadly crash-related charges is on Dec. 1.

GEM eX launched as fully street-legal electric UTV

Waev Inc. has just unveiled the GEM eX, a new electric utility vehicle designed to bridge the gap between street-legal low-speed vehicles (LSVs) and true off-road work machines. The company calls it the most versatile electric work UTV yet.

Unlike most golf cart-based UTVs or high-speed recreational rigs, the GEM eX is purpose-built for commercial, industrial, and government fleets that need to move between city streets, job sites, and rough terrain, all while staying emissions-free.

The vehicle features a top speed of 25 mph (40 km/h) and is said to be DOT street-legal as an LSV on roads up to 35 mph (56 km/h), giving it a clear advantage over most off-road-only competitors.

Power is provided by a 6.5 kW motor in a rear-wheel drive setup with a limited-slip rear differential. An 8 kWh battery provides enough juice for a claimed maximum range of 85 miles (137 km).

The eX comes with several fleet-focused safety and utility upgrades, including 3-point seat belts, roof crush protection, backup camera, mirrors, pedestrian noise emitter, and a robust bumper system. It rolls on street, winter, or all-terrain tires, and the chassis features 9.5 inches (24 cm) of ground clearance, 6.5 inches (16.5 cm) of suspension travel, and a 50-degree approach angle for climbing curbs or crossing uneven work terrain.

Hill-hold assist and single-pedal descent control make it easy to handle on slopes, while a limited-slip differential helps maintain traction without chewing up turf.

In the back, a 1,250 lb (567 kg) composite dump box can fit a full-sized pallet and comes with gas-assist or electric lift options, while towing capacity matches that at 1,250 lb (567 kg). Optional hard doors, roll-down windows, and HVAC with heat and A/C turn it into a true all-weather workhorse.

The lithium iron phosphate battery pack is said to provide a long lifespan for extra durability in extreme climates from -20°F to 140°F (-29°C to 60°C). Charging is

GEM

flexible via 120V, 240V, or J1772 public stations, and Waev backs the battery with a 7-year warranty – on par with many passenger EVs.

“We field-tested the GEM eX everywhere from Arizona deserts to Minnesota winters,” said Sven Etzelsberger, Waev’s Director of Engineering. “Every piece of customer feedback went back into this vehicle. The result is a work UTV that’s refined, reliable, and ready to go.”

The GEM platform has expanded significantly over the years, from its humble beginnings as a simple people mover to more recent adaptations into everything from ambulances and emergency vehicles to the new GEM eX electric UTV.

Priced at \$24,955, the higher purchase price may be one of the few downsides

to the quieter, cleaner, and easier to maintain alternative to traditional gasoline-powered UTVs.

Atlanta Firm Holds the Key to Getting More Golf Carts on the Road — and Cutting Global Emissions

For Atlantans accustomed to battling interstate traffic, a three-mile commute may seem like a dream.

But it's one that more people around the world are making a reality, says XiQ co-founder and CEO Karlos Walkes, and they're increasingly aligning their transportation choices accordingly.

That's an opportunity for XiQ, short for ElectronixIQ, an Atlanta-based startup making the patented FleetQi device to replace the keyed ignition in golf carts.

Blending hardware and software, the FleetQi instantly converts electric carts to a push-button start, but beyond convenience, it also unlocks opportunity by creating a sort of operating system for owners and fleet managers.

"Imagine a Roku for your television. It's al-

most the equivalent — this device will allow the vehicle to do more and allow the user to do more with their vehicle, because they're demanding more," Mr. Walkes said during an Atlanta International School sustainability event organized by Global Atlanta.

For golf courses, this solves an immediate need while paving the way for future revenue growth.

"Five keys operate 90 percent of golf carts," Mr. Walkes told Global Atlanta, noting that the industry has failed to keep up the tech advances seen in cars. "That's why theft is such a huge problem."

Beyond security, however, lies connectivity. With a simple ignition changeout, connecting via Bluetooth to a smartphone, the owner of each golf cart — or forklift, boat or excavator for that matter — now has the ability to secure, track, control and manage their asset, generating valuable usage and

geolocation data that can be monetized in various ways. XiQ's intellectual property protects the way the device connects with a smartphone.

"We've identified that invisible market that you should have access to," Mr. Walkes said of the non-automotive space. "It's removing friction. It's more efficient. But most importantly, it opens up more monetary opportunity by bringing data to the game."

As manufacturers like Georgia-based Club Car and EZ-GO, or recreational vehicle makers like Yamaha and Polaris, better understand the way their vehicles are used, they can dream up better ways to target consumers across channels. Fleet managers, meanwhile, can use XiQ to control access to their vehicles, enabling Turo-style rentals, or simply to monitor where the vehicles travel and improve efficiency.

And then, there's the environment: Getting rid of the key is what Mr. Walkes believes will open the door for world-changing impact.

XiQ's sustainability strategy has a few layers: For one, by introducing modern technology that consumers expect but non-automotive OEMs have been loath to tackle, the company aims to keep electric golf carts on the road longer, reducing the baked-in emissions of new vehicle purchases.

But the real benefit shows up when a small EV can replace a gas-powered car, either on a sin-

FleetQi provides a push-button start, replacing basic keyed ignition for golf carts.

gle trip, or optimally, as an overall vehicle of choice that fits with the driver's ongoing lifestyle.

The latter is what XiQ is hoping to drive. Some 1.25 million golf carts are already in use around the U.S., with 15 percent of them used daily. XiQ's data can help policy makers increase use of the remaining 85 percent by helping owners (and manufacturers) understand where they can already drive their carts on public roads and how to further outfit them for street-legal use.

"Because we've literally figured out how to touch this market with the hardware, we can move the data to enable governmental institutions to understand, 'Well, how can we utilize these vehicles that are being used by these individuals to promote emissions reduction?'" Mr. Walkes said.

Without putting any additional EVs on the road, XiQ believes the deployment of its devices in existing vehicles, in the U.S. alone, can reduce emissions at a level equivalent to removing 100,000 gasoline-powered cars per year.

Teeing Up Global Opportunity

Beyond the American market — and even beyond golf courses — the opportunity is vast, especially in the Middle East and Asia, where communities are being designed from the ground up with clean-energy transportation in mind, Mr. Walkes said.

Golf carts "are no longer luxury items. They're utility vehicles," he added.

Buoyed by pilot programs and contracts

with major golf cart rental outfits and distributors, as well as participation in one of the early cohorts of the Comcast Sportstech Accelerator, XiQ is pursuing a distributor in Dubai to tap into the construction boom in the Gulf region.

In the ritzy enclave of Monaco, he added, there's a move to "enable watercraft as alternative transportation, to transition away from the limitations of roads to waterways ... and they're moving with our technical technology to enable that," he said.

In Europe overall, the sale of FleetQi is a "value-driven conversation," meaning that companies understand the device not only for its immediate utility, but for its climate and commercial possibilities. "This fits with what we want to do."

Mr. Walkes admits that with the hardware alone, his business could eventually hit a "brick wall," but the FleetQi is the first step in a quest XiQ has undertaken to enable connection, communication, then commerce, following the model that car makers and gig-economy platforms capitalizing off data based on underlying assets. XiQ's FleetQi device, formerly known in the industry as the Stinger, is manufactured in Norcross.

"We have a model that's prepared for adaptation, for evolution, and that means survival. But in this process, we're not just surviving, we thrive."

JUST FOR FUN GOLF CART NAMES

Funny Names for Your Golf Cart: Because “Just a Golf Cart” Is Boring

Let’s be honest—naming your golf cart isn’t just for fun. It’s a declaration. A personality statement. A way to tell the world, “Yes, I have wheels, and yes, they sparkle brighter than your driver’s swing.”

Start with the classics. If your cart is dependable but slow, “Old Faithful” fits like a comfy glove. If it’s fast (or at least feels fast), go with “Lightning McGreen” or “Zoomerang.” For those who like to park dramatically near the clubhouse, “The Puttmobile” or “Fore-Wheel Drive” add that flair of dad-joke perfection.

Of course, golf carts often have... personalities. The one that refuses to start on Mondays? “Cartastrophe.” The squeaky one? “Whine

& Dine.” The quiet electric type? “Silent But Deadly.” If you tend to drive it like you’re avoiding cart-path rules, “Reckless Abandon” might be your spirit name.

Feeling classy? Try “Gatsby,” “Bentlee,” or “Rolls-Rejoice.” Feeling beachy? “Sand Trap Queen” and “Salty Stallion” hit just right. For couples’ carts, “His & Shanks” or “The Love Buggy” are guaranteed to get smiles.

At the end of the day, your golf cart deserves a name that matches your vibe—fun, a bit mischievous, and maybe slightly unhinged. Whether it’s “Cart Blanche,”

“Fore Play,” or “The Green Machine,” the right name turns every round into a joy-ride.

So grab your Sharpie, slap that nameplate on, and ride off proudly into the fairway sunset. After all, life’s too short to drive something nameless.

A bison is shown from the side, standing on a paved road. The background is a dramatic blue sky with bright, jagged lightning bolts. The text is overlaid on the left side of the image.

Infrastructure from the Family Business to Urban-Based Multi-Modal Distribution Hub

How do family businesses relate to urban multi-modal distribution hubs? Both are part of a market infrastructure. Many golf car dealers have been handed down often from two to three generations. Multi-modal distribution and transportation systems, on the other hand, especially in densely-populated urban areas are usually the product of public-private investment projects. In this article, the case is presented that the latter may be a great business opportunity for the former.

Multi-modal systems often lack a key ingredient in serving the public

Multi-modal systems are mainly focused on tying together the subsystems of rail and municipal transit systems. Implemented through bus and trucking services, such systems often lack the ability to get goods and services to final customers in a convenient, efficient, and timely way.

In the age of e-commerce and same day delivery services enjoyed by suburban residents, urban center residents are still lacking these benefits. But major changes may be on the way.

Last mile, same day delivery systems on steep growth track

A recent article in the e-newsletter, Supply Chain Dive, featured a story about the expansion of same day delivery systems by Walmart, Amazon, and Target. This is a logical progression from Big Box stores—

BEYOND *The Gated* COMMUNITY

By Stephen Metzger
Managing Director
Small Vehicle Resource, LLC
smetzger@smallvehiclresource.com
www.smallvehiclresource.com

Last mile delivery in crowded urban centers is oh-so 19th century.

essentially retail warehouses—to doorstep delivery to the customer. In large part the companies are responding to significant increases in their e-commerce business and the competitive attractiveness to consumers of quick delivery of the ordered item.

Target is implementing its strategy across a wide range of U.S. cities., and in Dallas, TX the company has invested in a fleet of Chevrolet delivery trucks, which are electric powered. The fact that these vehicles, 35 of them, are electric-powered required a charging system and fleet management system. The steps taken to put things together could serve as a model for selling and promoting the use of golf car-type utility vehicles in these networks.

The collaboration needed to complete the system

Supplying the vehicles is one thing but clearly insufficient to implement the full system. To do this GM connected with two independent specialist companies to furnish the drivers on the one hand, and the charging system, on the other. The two companies are Frontdoor Collective and Circuit EV Solutions, respectively.

As the Supply Chain Dive article notes, “The retailer is adding the delivery capacity thanks to an arrangement with the Frontdoor Collective and Circuit EV Solutions. Through a “fleet subscription program,” the Frontdoor Collective staffs the BrightDrop vehicles with drivers through [its franchise delivery model](#), while Circuit EV Solutions manages charging infrastructure and fleet support, per the release.

Gretchen McCarthy, Target’s chief supply chain and logistics officer, [wrote on LinkedIn](#), touts the collaboration: “Our new electric vehicle partnership with The FRONTdoor Collective is an exciting example of that — higher capacity delivery vans that reduce carbon emissions.”

The article goes on: “Executives with the Frontdoor Collective, Circuit EV Solutions and General Motors said the EV program will help

Bulky trucks and off-loads are not likely to work in crowded urban centers.

customers make deliveries more sustainably while removing obstacles for electric delivery at scale, such as finding adequate charging infrastructure. "This alliance removes the historic roadblocks to electrifying last-mile delivery," Dan Bourgault, CEO at the Frontdoor Collective, said in the announcement. "With the launch of this comprehensive solution, we now have the vehicles and infrastructure, and the trained workforce ready to go."

Golf car manufacturers have much of this know-how, plus the vehicles in-house

Looking at the pieces of this last mile delivery system, we see big box store Target as the organizing entity and putting together the two

collaborating companies for on the ground implementation.

In their fleet management products golf car manufacturers furnish both the vehicles and the control systems. It suggests that the market opportunity is identifying and approaching the retailers that are looking to enhance their local distribution systems—much as Target is doing.

GCT vehicles are a good for urban centers

Last mile delivery is not a brand new concept. It took off about five years ago during the COVID pandemic. What are the growth prospects and where can golf car-type vehicles fit in? To answer the latter question first, densely-populated urban centers are the most likely environments for GCT vehicles.

The combination of their relatively small footprint, adequate range, and substantial load capacity would appear to make them a good fit in crowded urban centers.

Why are the growth prospects for last mile delivery in urban centers?

To answer the second question posed above, a clear indicator of a positive growth outlook is the fact that a number of cities, including New York and Chicago at in the process of convert-

Cities are actively converting office buildings to residences with major growth implications for last mile delivery systems.

ing office high rises into residential housing units.

Courtesy of Smart Cities Dive, "Apartment conversion projects "accelerated at an unprecedented pace" across the U.S. in 2024, according to a new RentCafe report. Last year, nearly **25,000 apartments were completed** via adaptive reuse, up 50% compared to 2023 and double the amount of such conversions in 2022.

This appears to be an on-going trend and would have major implications for the distribution of consumer goods and services. This is highly likely, particularly in the context of growing e-commerce purchasing. As urban

centers become more populated, big box retailers, such as Target, will follow suit by locating their warehousing centers as close to the customer as they can and use fleet carrier systems to get to the final customer.

Strategic initiatives and needed

To take advantage of this growth opportunity, GCT manufacturers and dealers will have to break the mold of their usual way of doing business.. Developing this market will require an active outreach to big box suppliers and restaurant chains, companies that would be the primary coordinators of last mile, over-night or same day deliveries.

Small Vehicle Resource will be conducting a survey of GVT manufacturers and dealers to see whether this market is on the radar and to what extent. Stay tuned and see SVR's latest comprehensive report on the industry.

For information on Small Vehicle Resource's new industry analysis entitled, Trends and Outlook for the Small, Task-oriented Vehicle (STOV) Industry, 2019-2032: Tariff and Market Uncertainty contact Stephen Metzger at smetzger@smallvehicleresource.com, or call (914) 293-7577.

How Evolution Helps Women Embrace the Sport and Their Free Time

In recent years, the golf industry has seen a powerful transformation—one that's being led by women. Cultural shifts, better access, and community-driven initiatives are encouraging more women to step onto the greens—not just to compete, but to relax, recharge, and redefine their leisure time.

Women are Fueling a Cultural Shift in Golf

At the heart of this transformation is one important factor: accessibility. And that's where Evolution come in and help more

Easy Control, Confident Driving

One of the biggest hurdles new women golfers faced isn't on the green—it's how to get around it. Many women entering the sport feeling intimidated by traditional golf carts, which can be bulky, clunky, and difficult to maneuver.

Evolution counters that misconception with carts that are refreshingly easy to operate.

There's no steep learning curve—just hop in and go. Whether you're a first-timer or a seasoned golfer, you'll find that Evolution carts respond with precision and ease.

✓ One of Evolution's most beloved features among users is its quiet lithium battery drive electric motor. It allows for serene navigation across the course, letting users engage in meaningful conversations or simply soak in the natural beauty of the greens without the distraction of a loud engine.

women discover the joys of golf while making the most of their free time. With their intuitive controls, stylish design, and thoughtfully engineered features, Evolution is making the golf journey smoother, more enjoyable, and more empowering than ever.

✓ The multi-function dashboard layout, complete with USB ports and cupholders. Bluetooth connect touchscreen and sound systems for favorite podcast or setting the mood with music. Evolution even offers carts with ample storage space, so there's room for everything from extra

gear to a picnic basket. It's one less thing to worry about—and one more reason to relax and enjoy the ride.

- ✓ Evolution carts are equipped with advanced safety features like seat belts, LED headlights and taillights, turn signals, and rearview mirrors. Whether you're playing an early morning round or cruising the community in the evening, you'll feel secure and visible at all times.
- ✓ The adjustable steering column adds to the comfort, ensuring that women of all ages and statures can find a natural, confident driving position. And their comfortable two-tone leather seats with armrest make it easy to focus on the moment. More time spent enjoying the game, less time fiddling with controls.
- ✓ In order to keep you comfortable and confident throughout your ride—and the adjustable sliding windshield vents are a perfect example. These vents allow you to enjoy a refreshing breeze without the strong gusts that can mess up your hair or disrupt your comfort. Just turn the small knob and slide open the panel to adjust the airflow to your liking.
- ✓ What's more, every Evolution models come with canopies and optional enclosures—perfect for unpredictable days when a sun-drenched afternoon turns breezy or wet. These small but thoughtful additions empower women to enjoy the course on their terms, without having to compromise on comfort.

Driving Evolution From the Course to the Community

Today's women golfer doesn't just play rounds on the weekend—she might be using her golf cart to cruise through her neighborhood, attend local events, or run errands in style. Evolution carts transition seamlessly from fairways to community paths. They're as much a lifestyle statement as they are a golfing tool.

This versatility supports how many women use golf to carve out meaningful personal time. It's not just about improving technique—it's about investing in yourself, enjoying moments of quiet joy, or creating new traditions with friends and family.

Evolution Golf Cart-A Cart That Keeps Up with Her

Golf is no longer just a man's game. It's becoming a shared space, shaped by women who bring their own goals, values, and expectations to the course. They want equipment that reflects who they are—confident, stylish, and capable.

Whether you're a seasoned player, a curious beginner, or someone looking for new ways to enjoy free time, Evolution golf carts are here to support your journey. Because your time matters. Your comfort matters. And the joy of the game should always be within easy reach.

So go ahead ladies—gather your group, pack your favorite snacks, and head to the course. With Evolution, it's more than a game. It's your time.

Golf carts may soon cruise Cleveland streets — just don't expect Put-in-Bay vibes

CLEVELAND, Ohio — Golf carts may soon be allowed on Cleveland's streets — but only for businesses offering tours and short rides for patrons looking to skip a walk.

Mayor Justin Bibb has proposed legislation that would allow businesses to operate golf carts on city streets. Those carts would be subject to yearly inspections, traffic restrictions and a \$150 fee per vehicle.

City Council, while cautious, approved an amended version of the legislation at Wednesday's public safety meeting. It still must go through another committee meeting and a full council vote before any golf cart regulations become official.

Bibb's safety and city planning officials faced dozens of questions from council members, who wanted to make sure allowing golf carts didn't lead to a bigger issue down the road.

"I want to make sure we're not opening Pandora's box here," said Councilman Mike Polensek, who chairs council's public safety committee. The city has long had problems with nuisance drivers, whether they be street-legal dirt bikes or street takeovers. City planning director Calley Mersmann said the city is considering new golf cart rules because businesses have shown an interest in using them.

One business was Bob's Bike Tours, a company that takes customers on bicycles through neighborhoods like downtown, Ohio City and Tremont. Bob Polk told council at the meeting he wants to offer golf cart tours for those who can't ride a bike.

There's also The Golf Cart Girl Cleveland, which wants to use golf carts for short rides, similar to how an Uber or Lyft would work. Owner Chris Taylor said he wants to pick up people downtown and shuttle them to events, like Browns or Cavs games. Some businesses are also interested in making it easier to hop from one entertainment district to another.

Taylor told cleveland.com he had briefly operated, taking patrons to Browns' games in 2023, but was shut down by the city. He said starting in June 2023 his company has worked with Cleveland to legalize this kind of golf cart business.

The legislation would do the following:

Any business that wanted to use golf carts would apply to city officials for a permit. Each golf cart would be inspected and licensed at a fee of \$150 per vehicle annually.

Each cart must have safety features like brake lights, seat belts and turn signals. They'd

be allowed on any street with a speed limit under 35 mph, but the carts themselves can't go over 25 miles per hour.

Only drivers who worked for approved businesses could operate carts. Carts can't be rented out to drivers.

Public safety officials can create no-go zones where carts can't travel, similar to restrictions that currently exist for electric scooters and bikes on gamedays.

Council also amended the legislation to make sure that any golf carts were marked with the name of the business that operated them.

Additionally, Cleveland could implement drop-off fees for carts in the future. So, a golf cart company may have to pay \$5 each time they unload patrons at Willard Park, for example.

State law allows golf carts to be street legal but leaves it to the cities to create rules and regulations, Mersmann told council. She said Cleveland thought it would be best to start with businesses and see how that works, before considering whether personal golf carts should be allowed throughout the city.

One injured after Brightline train hits golf cart in Miami Shores, officials say

A Brightline train hit a golf cart at the Miami Shores Country Club, sending one person to the hospital Monday morning, Miami-Dade Fire Rescue said.

PHOTO: A Brightline train crosses through Northwest 20th Street near North Dixie Highway on Thursday, April 10, 2025, in Boca Raton Fla. On Monday, Oct. 13, 2025, a Brightline train hit a golf cart at the Miami Shores Country Club, injuring a person. Photo by Matias J. Ochner mocner@miamiherald.com.

The incident happened around 10:45 a.m. at the club, located at 10000 Biscayne Boulevard.

The person driving the golf cart was able to jump off the vehicle before it was struck by the train, but was injured in the process, per fire rescue. Paramedics took

the person to a hospital, the department said. Their condition was not immediately known.

Massive Elk Charges Golf Cart In Incredible Video

A massive elk wasn't interested in seeing golfers nearby.

There are few animals walking the planet bigger than a bull elk. The creatures are absolutely massive, and they can weigh more than 1,000 pounds.

While generally pretty easy going, elk can get spun up if they feel threatened. If they do, I suggest not being anywhere near them.

That's one lesson some golfers learned the hard way.

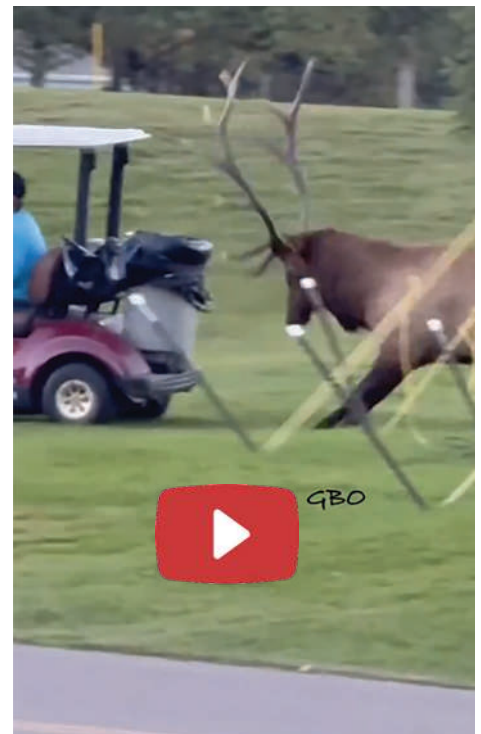

An incredible video shared by @goodbullguided on Instagram of a massive elk charging a golf cart

is going viral, and it's definitely worth checking out.

Whiskey Riff reported the incident occurred in Rocky Mountain National Park.

EDITORS NOTE: A bull elk can weigh around 1,000 pounds, and the racks on the animals can also be huge.

Contractors Association Gives The Golfin Dolphins New Wheels

The Golfin' Dolphins and their coach Mary Coleman-Sayer, center, have some fancy new wheels to use on the course this season, courtesy of a golf cart donation by the Florida Keys Contractors Association.

Members of the association purchased raffle tickets for the cart in a fundraiser this past summer organized by Marathon Grill & Ale House bar manager Andy Sharf to benefit cancer research through the Dana-Farber Cancer Institute. When their ticket was pulled, association president

Armand Messina, right, and vice president Charlie Brown knew just where they wanted the cart to go. Already painted blue to match Marathon's school colors, the cart got some custom gold lettering this summer to complete the look.

SOURCE

Why one Michigan town is regulating its golf cart boom

For someone with zero interest in golf, Cathy Kochensparger sure loves her golf cart. She bought it as a family cruiser and drives it around town almost daily, but says that safety is paramount.

"You've got to be aware of your surroundings, people and other vehicles," Kochensparger said.

St. Johns, Michigan, is aware its surroundings are changing. In the city of roughly 8,000 people, golf carts motor side-by-side with everyday traffic. St. Johns started regulating them last month — one of hundreds of communities across the country — putting restrictions on which

roads the carts can be driven on.

St. Johns Mayor Scott Dzurka said the city has roughly 2,000 golf carts used primarily for transportation.

"Heaven forbid something happens on one of them. If that golf cart gets in a wreck, it's pretty disastrous," Dzurka said.

Safety is the primary reason why more than two dozen communities in Michigan alone have passed ordinances regulating golf carts on public roads.

Michael Fagan owns a booming golf cart business, but says golfers represent only 5% of his

customer base. The big seller is lifestyle.

"And even year-round, 'cause we put snow plows on 'em, salt spreaders. You know, people are looking at me goofy when I say that, but we probably sell 15 to 20 snow plows a year," Fagan said.

St. Johns resident Ed Thelen opposes golf carts mixing with cars because of the safety issues they pose.

"If a cart hits a car, the golf cart is just going to lose. There's nothing there to protect the people in the golf cart," Thelen said.

St. Johns just started inspecting golf carts, similar to cars, for working turn signals and horns. Drivers also have to be at least 18 years old and hold a valid drivers license.

By law now, Kochensparger can drive her cart only on streets where the speed limit is 25 miles an hour or lower. Her golf cart's speed limit is 15 miles per hour.

When asked if she feels safe in one, Kochensparger said, "Oh definitely, definitely I do. I wouldn't take my grandkids on it if I didn't."

Skydivers, Drones, and 130 Carts: Palm Desert's 61st Golf Cart Parade Kicks Off Season on El Paseo

On a warm, crystal-clear afternoon, Palm Desert officially welcomed season with the 61st Annual Golf Cart Parade on El Paseo—complete with a skydiver landing sequence and live drone views that gave spectators a bird's-eye perspective of the entire route. The high-flying kickoff, presented with support from General Air Conditioning and Plumbing, set the tone for a fast-moving showcase of more than 130 parade entries.

Grand Marshals Tim O'Brien—NBC Palm Springs Sports Director—and Fuego of the Coachella Valley Firebirds drew cheers early, followed closely by NBC Palm Springs teammates rolling in a playful California Dreamin' motif. From there, the parade delivered a true slice of local life: the Palm Desert High School Marching Aztecs and Palm Des-

ert Charter Middle School ensembles kept the beat, while the Palm Springs Air Museum pipe band, cadet corps from multiple schools, and dance academies filled the avenue with color and motion.

The City of Palm Desert, this year's title sponsor, celebrated community pride with award-winning design work on its floats. SunLine Transit Agency kept spirits high with a humorous, crowd-pleasing entry, and senior seating expanded to 400 shaded spots thanks to longtime support from the Allen Foun-

the Living Desert Zoo and Gardens, Loving All Animals, and the Standard Poodle Club & Rescue—brought out eye-catching carts and four-legged stars. Businesses along El Paseo, including restaurants and retailers, leaned into the theme, while community partners such as McCallum Theatre highlighted the arts heartbeat that helps define Palm Desert's season.

Law enforcement and first responders from the Palm Desert Sheriff's Station and CAL FIRE ensured a safe, smooth event as the procession moved brisk-

ly down El Paseo. With thousands lining the street and a drone feed capturing the action from above, organizers with the Palm Desert Area Chamber of Commerce kept the tradition rolling—proving once again why this multi-genera-

tional parade is the city's unofficial start to the season.

[SOURCE](#)

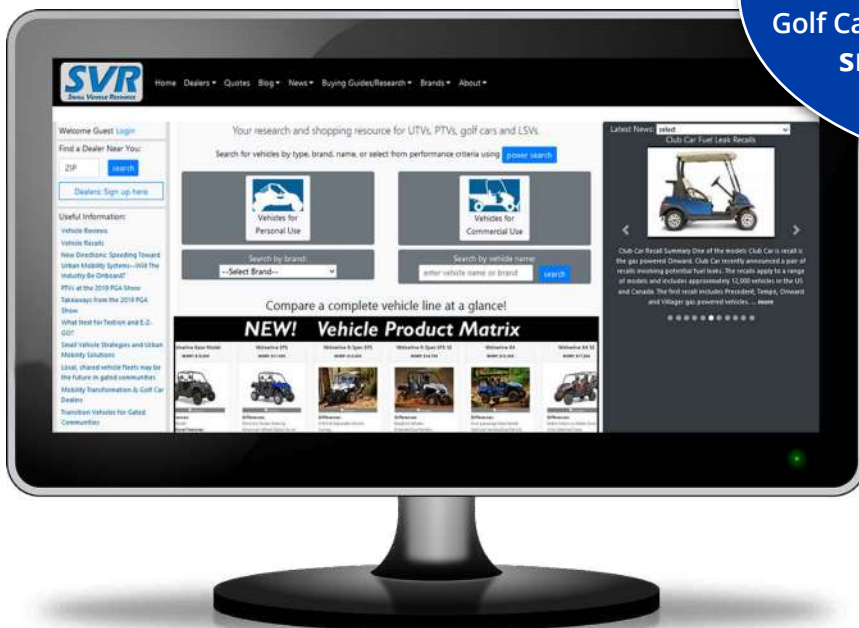

tional parade is the city's unofficial start to the season.

Cricket Carts Direct Launches Enhanced RX5 Plus: The Most Advanced Collapsible Electric Golf Cart for RV Travelers

Cricket Carts Direct, the nation's #1 dealer of portable, collapsible electric golf carts, today announced the launch of the Cricket RX5 Plus, an enhanced four-seat model featuring an integrated lift system, upgraded suspension, and increased top speed. This latest addition to the Cricket lineup delivers premium performance while maintaining the compact, foldable design that has made Cricket Carts the preferred choice for RV owners, campers, and travelers nationwide.

The Cricket RX5 Plus addresses the evolving needs of mobile adventurers who demand more power, comfort, and convenience without sacrificing portability. Building on the success of the bestselling RX5 model, the RX5 Plus incorporates customer-requested enhancements including a built-in lift system for effortless loading and unloading, custom deluxe wheels and tires for improved handling, and enhanced motor performance reaching speeds of 15-17 mph. Despite these upgrades, the cart maintains Cricket's signature collapsibility, folding to just 60"x38"x35"

CRICKET CARTS

to fit in RV bins, truck beds, and compact SUVs.

“RV travelers told us they loved the RX5’s portability but wanted even easier loading and more power for varied terrain,” said a spokesperson for Cricket Carts Direct. “The RX5 Plus delivers exactly that—premium features that make adventures smoother while keeping the fold-and-go convenience that defines Cricket Carts.”

The RX5 Plus features full four-wheel suspension that absorbs bumps and uneven surfaces, making it ideal for campgrounds, resorts, farms, and event venues. The cart’s 600-pound load capacity accommodates four adults comfortably, while the reinforced frame and OEM-only components ensure durability season after season. Standard equipment includes a full-length roof for sun and rain protection, ergonomic

seating with ample legroom, and intuitive steering wheel controls.

One of the RX5 Plus’s standout features is the integrated lift system, which simplifies the loading process for customers who frequently transport their carts. This factory-installed enhancement eliminates the need for aftermarket ramps or manual lifting, allowing a single person to load the cart into an RV bin or truck bed with minimal effort.

Cricket Carts Direct’s commitment to quality extends beyond the cart itself. As an authorized dealer, the company provides lifetime limited customer care warranties exclusive to Cricket Carts Direct customers, factory OEM parts only—never aftermarket substitutes, nationwide shipping within three days of order, and dealer-direct pricing that beats MSRP on every model. These advantages have established Cricket Carts Direct as the trusted source for portable electric golf carts across the United States.

“We’re not just selling carts—we’re supporting our customers throughout their ownership experience,” the spokesperson added. “Whether you need technical support, replacement parts, or customization advice, our team is here for the lifetime of your Cricket Cart.”

The RX5 Plus is available with optional lithium battery upgrades that extend range up to 70 miles per charge, reduce charging time by half, and provide consistent power delivery even on inclines. Additional customization options include Bluetooth sound systems, upgraded seating configurations,

safety accessories including seat belts, protective covers and windshields, and haulers and ramps for specialized transport needs.

The launch of the RX5 Plus strengthens Cricket Carts Direct's position as the leader in collapsible electric mobility. The company's focus on portability without compromise has resonated with diverse customers including RV enthusiasts exploring campgrounds nationwide, equestrian communities navigating event venues and farms, resort and golf course operators seeking space-efficient fleet options, retirees prioritizing mobility and independence, and homeowners with limited garage or storage space.

Cricket Carts Direct offers flexible financing through Synchrony Bank, making premium portable mobility accessible to more customers. The straightforward three-step application process provides quick approval decisions, allowing buyers to bring home their Cricket Cart and start their adventures without delay.

The Cricket RX5 Plus is available now for immediate order with delivery within

three business days to most U.S. locations. Customers can explore full specifications, customization options, and build their ideal Cricket Cart online.

About Cricket Carts Direct

Cricket Carts Direct is the #1 U.S. dealer of Cricket portable, collapsible electric golf carts. Specializing in innovative mobility solutions that fold to fit anywhere, Cricket Carts Direct offers the complete Cricket lineup including the RX5, RX5 Plus, SX3, and ESV models. Each cart combines lightweight engineering, durable construction, and compact storage capability—ideal for RV travel, camping, events, and everyday mobility. With exclusive lifetime limited customer care warranties, dealer-direct pricing, OEM parts only, and nationwide three-day shipping, Cricket Carts Direct delivers effortless mobility backed by lasting support. Built to move when you do—collapsible, portable, and ready for adventure.

GOLF CART/LSV NEWS FROM VIETNAM

Massimo Group
Expands
International
Production Through
Vietnam Partnership
and Launches
Lithium-Ion MVR
Golf and Utility
Carts for 2026

Massimo Group (NASDAQ: MAMO), a manufacturer and distributor of powersports vehicles and products, today announced that production of its new 2026 MVR Golf Cart and MVR Cargo Max Electric Utility Cart has begun in Vietnam.

This strategic collaboration strengthens Massimo's global supply chain and supports the company's ongoing initiatives to enhance production flexibility and expand capacity for its rapidly growing lineup of electric vehicles.

Strategic Vietnam Partnership Enhances Global Capabilities

"Our partnership in Vietnam represents an important milestone in Massimo's continued evolution," said David Shan, Chief Executive Officer of Massimo Group. "By leveraging international manufacturing relationships, we're improving efficiency, lowering costs, and expanding our ability to meet accelerating demand across both recreational and utility markets."

The Vietnam production partnership enables Massimo to increase output while maintaining the company's quality and value standards for its dealer network and end customers worldwide.

Introducing New Lithium-Ion Power Options

Coinciding with this production expansion, Massimo is introducing new Lithium-Ion battery options across its MVR Series electric carts. The upgraded 48V 105Ah system delivers higher performance, longer lifespan, and greater efficiency compared to traditional lead-acid batteries.

Key benefits include:

- Significantly reduced weight for improved range and handling
- Faster charging and extended cycle life exceeding 5,000 charge cycles
- Built-in battery management and safety protections
- Maintenance-free, eco-friendly operation

"The addition of lithium power across our MVR line-up reflects the strong feedback we're hearing from dealers and customers," Shan added. "These updates make our products more competitive, more efficient, and better aligned with the future of electric mobility."

Positioned for Growth and Value Creation

Massimo's expansion into Vietnam and adoption of advanced battery technol-

ogy are expected to improve gross margin performance, strengthen logistics, and support scalable international growth. These initiatives reflect the company's broader strategy to expand global manufacturing partnerships and deliver innovative electric solutions.

About Massimo Group (NASDAQ: MAMO)

Massimo Group is a leading manufacturer and distributor of powersports and electric vehicles, headquartered in Garland, Texas. The company's product line includes UTVs, ATVs, e-bikes, and electric utility vehicles designed for performance, reliability, and value. With expanding international manufacturing partnerships, Massimo is building a strong foundation for sustained growth in the global electric mobility market.

secure peace of mind

WITH GOLF CART INSURANCE

Are you a proud golf cart owner who loves to explore the neighborhood, cruise through parks, or run errands in your stylish ride? If so, it's time to consider a game-changing investment—golf cart insurance, tailored specifically to you. Here are a few reasons why golf cart insurance is a wise decision.

Peace of mind

Golf carts are not exclusively golf course companions but versatile vehicles for many occasions. Whether you're traveling within your community or navigating local paths, golf cart insurance provides coverage in case of unforeseen events, ensuring your peace of mind while you're on the go.

Protect your golf cart

Your golf cart is a valuable investment that deserves protection. With comprehensive and collision coverage, you can rest easy knowing that repair or replacement costs will be covered in the event of certain damage, theft, or accidents. Keep your ride in top condition without breaking the bank.

Be prepared for the unexpected

Accidents can happen anywhere, and being prepared is crucial. Golf cart insurance provides liability coverage, protecting you financially up to specified limits in case you accidentally cause property damage or injury to others while cruising around your community.

Homeowners insurance

Homeowners insurance may provide some coverage for your golf cart, but it often has limitations and can have a more costly deductible. A dedicated golf cart insurance policy ensures that you're adequately covered specific to your needs.

Family and friends

Policies can provide off-premises and permissive use, allowing you to confidently have friends and family drive your golf cart occasionally. You also have the option to add minor operators as drivers, so you can rest easy knowing that you have the right protection if something goes wrong.

Personalized protection

Your golf cart usage is unique to you. That's why specialized insurance is tailored to meet your specific needs, ensuring you can choose coverage options like accessory and custom parts/equipment coverage to provide protection if you've made enhancements or upgrades to your golf cart.

Legal compliance

Some areas mandate insurance coverage for golf carts. Stay on the right side of the law and avoid potential fines or penalties by securing the necessary insurance for your ride.

Investing in golf cart insurance is a smart decision that goes beyond mere protection; it's about enjoying your rides worry-free. Don't let unexpected events derail your joyrides—secure your golf cart insurance and roll into every adventure with confidence!

WEST COAST GOLF CARS | (813) 634-6671

West Coast Golf Cars: quality products, great service and Skippy

westcoastgolfcars.com | Sun City Center and Tampa, FL

Celebrating more than 40 successful years in business doesn't happen by accident. It takes vision, grit and unwavering commitment. That's why West Coast Golf Cars has been a trusted dealership in Sun City Center since 1984—and it's still going strong.

Owned and operated by Alexis Anderson and her husband, Stuart, the shop specializes in American-made E-Z-GO golf carts, offering new, pre-owned and rebuilt models (from the chassis up), along with a full inventory of parts. The company's reputation for exceptional service and maintenance

keeps customers coming back and referring others to join them.

"We offer great, American-made products—the best in the industry," she said. We treat people like we want to be treated, and our service team of three E-Z-GO mechanics has more than 50 years of combined experience. And if you include Stuart, who occasionally still gets in there and picks up a wrench, it's about a 100 years!

The Andersons stand firmly behind every cart they sell.

"We limit our inventory to many models of one exceptional product," she added. "Imported cars may have all kinds of bells and whistles, but the quality is lacking. I call it lipstick on a pig. And their limited parts availability is even worse now with the tariffs."

"Everything we sell is warranted—whether new or used. We offer low-interest financing on new and late-model used cars, and we're the only non-corporate, family-owned and operated dealer in the community."

Then there's Skippy—the family's beloved 8-year-old Labrador retriever and official shop greeter. The former Dogs Inc. puppy was hosted by the Andersons during her breeding years and became a permanent member of their household when she retired. She took over the ambassador role from Skylar, another Dogs Inc. alum they homed.

"Customers frequently stop by just to see Skippy," Anderson said. "She's become a celebrity."

Their 29-year-old son, Paul, joined the dealership after graduating college in 2019. He is being groomed to take over when his parents retire—ensuring the family legacy continues rolling forward.

In addition to sales, West Coast Golf Cars offers an annual, every six-weeks maintenance program for customers who own E-Z-GO carts with lead acid batteries. For

anyone owning an E-Z-GO or Club Car cart that's sat idle over the summer, the shop also provides take-home battery boosters. The \$35 fee goes to Dogs Inc., supporting the organization that brought Skippy and Skylar into the Andersons' lives. They also accept donations for the nonprofit organization.

West Coast Golf Cars is at 120 Pebble Beach Blvd, S, Sun City Center. For more information, stop by or call 813- 634-6671.

About E-Z-GO

E-Z-GO was founded in 1954 by brothers Billie and Beverly Dolan in a modest one-room machine shop in Augusta. In 1960, they sold the company to Textron Inc., a multinational Fortune 500 corporation. Since the acquisition, E-Z-GO has grown into a leading manufacturer of high-quality, innovative golf carts and utility vehicles.

PUSH BUTTON START KIT

Take your golf cart experience to the next level with our Push Button Start Kit for Golf Carts—where convenience, security, and reliability come together in one sleek system. Simply carry the waterproof key fob in your pocket or bag, press the dash-mounted button, and your cart comes to life instantly—no keys required.

The system's ECU is housed in a rugged, waterproof case, shielding critical electronics from moisture, dirt, and harsh weather conditions, while the key fob itself is fully waterproof, so rainy days or morning dew are never a problem. Even if your key fob battery runs low, the fail-safe operation ensures you can start your cart without delay.

FEATURES:

Advanced security protocols

Our state-of-the-art encryption technology blocks even the most sophisticated car theft methods, protecting your vehicle against Re-

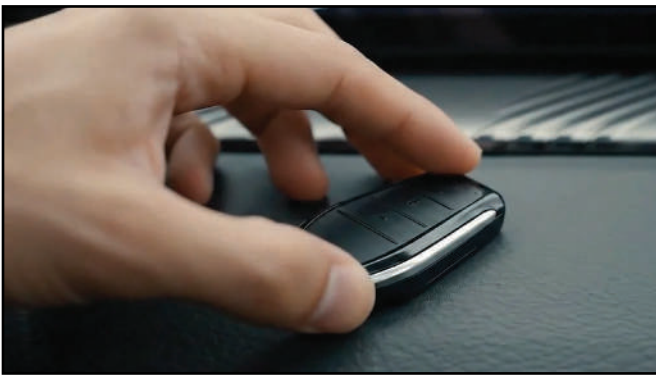

mote Replay and Relay Attacks.

Engineered to match automotive standards

Delivering reliable performance and long-lasting durability. Designed with automotive components, it ensures a consistent keyless start experience that brings modern convenience to your cart.

Customize your keyfob

The three key fob buttons can be used to control your favorite golf cart features or accessories with a single press.

Fail-safe mode

If the battery in a Key Fob is low, the Fail Safe Functionality allows the user to place the Key Fob near a designated area in the golf cart to activate the Push to Start Button and start the cart.

Water proof enclosure and the start button

All electronic components are securely protected and sealed to ensure their integrity and functionality.

Designed with advanced encryption technology, it keeps your vehicle secure

against modern theft methods while delivering a smooth, effortless, and worry-free ride every time. Enjoy the perfect blend of innovation, protection, and pure driving pleasure with every push of the button.

1. The significance of incorporating a high-quality push to start conversion kit cannot be overstated. This essential component plays a crucial role in ensuring the smooth and efficient operation of a vehicle. By investing in a reliable push to start kit, you can enhance the overall performance and convenience of your vehicle.

Security

2. One of the primary reasons why it is imperative to add a top-notch push to start conversion kit is the enhanced security it provides. With advanced features such as keyless entry and ignition, these kits offer an added layer of protection against theft and unauthorized access. By eliminating the need for a traditional key, potential thieves are deterred, as the vehicle becomes

much more difficult to start without the proper authorization.

Convenience

3. Another key advantage of opting for a quality push to start kit is the convenience it brings to your daily life. Gone are the days of fumbling for keys or struggling to find the right keyhole in the dark. With a push to start system, all you need is the proximity of the key fob to the vehicle, and you can effortlessly start and stop the engine with the push of a button. This streamlined process not only saves time but also adds a touch of sophistication to your driving experience. Additionally, some push to start kits offer features like remote start, allowing you to warm up or cool down your vehicle before even stepping inside, making it particularly useful during extreme weather conditions.

Add Push to Start Conversion kit from VAIS Technology

The utilization of Vais Technology's push-to-start kit offers numerous advantages. Firstly, this advanced technology eliminates the need for traditional key ignition systems, providing a more convenient and effortless

way to start your vehicle. With just a simple push of a button, you can ignite your car's engine, saving you time and effort. Additionally, this kit enhances the security of your vehicle by incorporating advanced encryption and authentication protocols, making it extremely difficult for unauthorized individuals to start your car. Furthermore, Vais Technology's push-to-start kit integrates seamlessly with your vehicle's existing systems, ensuring a smooth and hassle-free installation process. Overall, this innovative technology not only enhances the convenience and security of your vehicle but also provides a modern and sophisticated touch to your driving experience.

Wacky FAQs and Fun Facts About Golf Cars

As you can imagine, we love golf cars. We love fast ones, ones that climb hills, and even ones used by golfers. We also love golf car culture. There are many misconceptions and curiosities swirling around the golf car community and these are our favorites.

Question: Why do some people say golf “cart” and some say golf “car”?

Answer: That little extra “t” makes a big difference. In the early stages of golf, an invention called the golf cart was used. Sure enough, it was used to carry golf clubs, bags, and other accessories, but it didn’t move on its own. Golfers would push or pull the cart through all 18 holes and then back to their homes.

Question: Are Americans obsessed with golf cars?

Answer: According to Golf Digest, Americans use golf cars six times more often than British golfers. Our fellow golfers across the pond view the use of golf cars as laziness, unless the golfer has a physical limitation.

Question: Why do some golf courses have a “cart path only” rule?

Answer: Although you may not particularly like the “cart path only” rule, it is important to respect it on the course. Over time, golf cars can speed up soil compaction, creating poor growing conditions for turf grass. If you value an ideal fairway, follow the rules.

Question: What is the most expensive golf cart?

Answer: At the 2017 PGA Merchandise Show in Orlando, FL, Garia Luxury Golf Cars displayed the Mansonry Prism Golf Car. Made in Germany, the golf car accelerates to 25mph in 2 seconds and is powered by lithium batteries. The luxury golf car has a luxury price tag of \$69,000.

Question: What is the longest journey made by a golf car?

Answer: The longest recorded golf car journey was taken on January 14, 2017 in India by two men who traveled 1034.6 miles.

Question: Is golf car insurance required by law?

Answer: It depends. In some states, such as Arizona, golf car owners are required to carry liability insurance if they drive the car on the road. Check your state for specifics. But, even if your state does not require insurance, it is a good idea to insure your golf car against theft or damage. Many golf car owners are surprised to learn that golf cars are not typically covered under their homeowner’s insurance policy.

Question: Are golf cars safe to drive?

Answer: According to the Consumer Products Safety Commission, 13,000 golf car

related accidents occur nationwide each year that require an emergency room visit. Many of these accidents are the result of negligence, distraction, or intoxication. As with any motorized vehicle, when safety precautions are exercised, golf cars are considered to be a safe form of transportation.

Question: Am I required to have a driver's license to drive a golf car?

Answer: In most states, golf car drivers must be at least 16 and have a valid driver's license to operate a golf car. But, in Florida, drivers must be at least 14 years old and are not required to be licensed drivers. This law is important to many retired Floridians, as many of them move to a golf car community where they still drive golf cars after their licenses have been revoked.

Did we miss a burning golf car question that you would like for us to answer? If so, email info@golf-caroptions.com and we will include it in our next FAQ article.

About the Author: The Founder/Former Owner of WHEELZ Custom Carts & Accessories, Julie Starr, was one of the industry's first online retailers of golf car products. The eCommerce store, www.WHEELZLLC.com, has served golf car owners since 2008 and remains a popular online shopping experience for golf car owners who want to take their golf cars to the next level.

Best Cold Weather Accessories

For Your GOLF CART

Just because the temperature drops doesn't mean your golf cart has to stay parked in the garage. Whether you're still hitting the course during milder winter days, using your cart around the neighborhood, or cruising through a holiday light display, staying warm is key to enjoying the ride. The good news? There are plenty of accessories designed to keep you comfortable even when it's cold outside. From full enclosures to heated seats, here's a look at some of the best ways to stay cozy all season long.

Enclosures: Your First Line of Defense Against the Cold

If you ride in cold weather, an enclosure makes the biggest difference. Think of it like adding walls and a roof to your cart—it blocks wind, traps heat, and makes

a massive difference in how comfortable you'll be. Enclosures come in several styles. Four-sided enclosures wrap your entire cart with clear vinyl windows and

fabric panels, giving 360-degree protection from wind and weather. Three-sided enclosures leave the back open, allowing airflow or easier access while blocking most wind. Track-style enclosures slide on mounted tracks for easy use, and hinged door enclosures operate like car doors for a more permanent look.

Most enclosures are pretty straightforward to install, but they're designed to fit specific makes and models, so double-check compatibility before you buy. Also, make sure you choose one made with quality materials like heavy-duty marine-grade vinyl that can handle UV exposure and cold temperatures.

Heated Seats: Warmth Where It Counts Most

Nothing beats sitting in a warm seat on a chilly morning. Heated seats might seem like a luxury at first, but once you try them, it can be hard to go without.

For the ultimate in comfort, premium heated and cooled seat systems like the Madjax ThermaFlex offer year-round climate control with dual temperature settings for driver and passenger. These replacement seats use advanced thermoelectric technology and offer multiple heating and cooling levels. They're a significant investment, but if you use your cart year-round, they're worth considering.

For a more budget-friendly option, heated seat covers slip over your existing seats and plug in to provide warmth. Most feature soft, quilted materials with built-in heating and multiple temperature settings. Look for covers with non-slip backing to keep them secure, and installation is usually as simple as stretching the cover over your seat and plugging it in.

Windshields: Block the Wind Without Full Enclosures

If you're not ready to commit to a full enclosure, a windshield still can provide some protection. It blocks that direct

blast of cold air hitting you head-on while you're riding, and the difference it makes in comfort

is bigger than you'd think, especially on windy days.

Windshields come in a few varieties. Fold-down windshields are popular because you can lower them when you don't need the protection, while fixed windshields stay in place year-round. Tinted models are a great option as well to reduce glare, and many come with built-in vents or flip-up sections for airflow on warmer days. Clear acrylic or polycarbonate materials are generally standard; they're durable, weather-resistant, and easy to clean.

Heated Steering Wheels: A Rare but Welcome Upgrade

Cold hands on a freezing steering wheel? Not fun. Keeping your hands warm while you're driving isn't just about comfort—cold fingers lose grip and react slower, which matters when you're taking turns or handling hills.

Heated steering wheels for golf carts do exist, though there aren't many options on the market, and they come with a higher price tag. These upgraded steering wheels have built-in heating elements that warm your hands as you drive. If you're someone who uses your cart regularly in chilly temperatures and wants every possible comfort upgrade, a heated steering wheel is worth looking into—just know that availability is limited compared to other accessories.

Final Thoughts

Just because it's cold outside doesn't mean your golf cart has to sit in storage. The right accessories can keep you comfortable enough to ride all winter long. Go big with an enclosure and heated seats, or keep it simple with a windshield, whatever fits your budget and how much you actually use your cart in the cold.

And if all this talk of upgrades has you thinking it might be time for a new cart altogether—one that's ready to handle whatever accessories you throw at it—head over to [CartFinder](#) and browse thousands of [new and used golf carts for sale](#) from trusted dealers across the country.

Stay warm, stay safe, and enjoy the ride this winter!

RECALL

Textron E-Z-GO Recalls Personal Transportation Vehicles Due to Risk of Serious Injury and Fire Hazard

HAZARD: The recalled PTV can leak fuel at the quick-connect fitting between the fuel line and the fuel injector mounted on the engine, posing a risk of serious injury and fire hazard.

RECALL DATE: October 16, 2025
RECALL NUMBER: 26-021

UNITS: About 90,800 (In addition, about 7,300 were sold in Canada)

DESCRIPTION: This recall involves E-Z-GO's model year 2020 through 2025 RXV Freedom and 2023 through 2025 Valor PTVs with serial numbers ranging from 5538278 through 5920722; and model year 2020 through 2022 TXT Freedom and Valor PTVs with serial numbers ranging from 3455024 through 3582057. The vehicle's serial number is printed near the base of the steering column for RXV and model year 2023, 2024 and 2025 Valor vehicles. The serial number is printed below the operator seat position for TXT and model year 2020, 2021 and 2022 Valor vehicles. These vehicles are commonly referred to as golf carts or golf cars and are used primarily to transport people.

REMEDY: Consumers should immediately stop using the recalled vehicles until they have been inspected and repaired, if needed. Consumers can contact Textron E-Z-GO for inspection instructions or contact an authorized Textron E-Z-GO dealer to schedule a free inspection. If any signs of fuel leakage are detected, the vehicle will be repaired by an authorized dealer free of charge by replacing the fuel line. Consumers who cannot take their recalled PTV to an authorized dealer for inspection or repair can contact Textron E-Z-GO or an authorized dealer for assistance.

INCIDENTS/INJURIES: None reported

SOLD AT: Textron dealerships and distributors nationwide from September 2019 through June 2025 for between \$8,400 and \$14,000.

MANUFACTURER: Textron E-Z-GO LLC, of Augusta, Georgia

MANUFACTURED IN: United States

Read the full report [HERE](#).

Textron E-Z-GO toll-free at 888-438-3946 from 8 a.m. to 6 p.m. ET, Monday through Friday, email at ezgowarranty@textron.com, or online at <https://ezgo.txtsv.com/personal/owners/recall-information> or <https://ezgo.txtsv.com> and click on "Recall Information" under the "Owners" tab.

Yamaha Recalls Model Year 2021-2025 Golf Car Vehicles Due to Risk of Serious Injury or Death from Crash Hazard

HAZARD: The recalled golf car vehicles lack stop lights, posing a risk of serious injury or death due to a crash hazard.

RECALL DATE: October 16, 2025
RECALL NUMBER: 26-028

UNITS: ABOUT 19,300

DESCRIPTION: This recall includes model year 2021-2025 Drive 2 Personal Transportation Vehicles (PTVs) Gas/Electric golf car vehicles. The recalled golf car vehicles were sold in a variety of colors. The following models and serial number ranges are included in this recall. The model name/number is located on the left and right side of the vehicle. Serial numbers are in various locations depending on the vehicle model. If you are unable to locate your serial number, contact Yamaha for assistance.

REMEDY: Consumers should immediately stop using the recalled golf car vehicles and contact an authorized Yamaha Golf Car dealer to schedule the free installation of two stoplights. For consumers who cannot take their recalled golf car to an authorized dealer, Yamaha will provide transportation or will install the stoplights at the location of the golf cart.

INCIDENTS/INJURIES: None reported

SOLD AT: Yamaha dealers nationwide from June 2020 through July 2025 for between \$8,300 and \$12,900.

MANUFACTURER: Yamaha Golf Car Company, of

Kennesaw, Georgia

MANUFACTURED IN: Japan

Maryland Golf **CART** Laws & Regulations (What You Need To Know)

Though Maryland may be a somewhat small state territorial, it has many laws that help to keep it safe.

Just a few of these laws include its golf cart regulations.

Many people want to ride golf carts on roads in this state but must follow federal, state, and local regulations.

Like with other states, these laws can vary wildly depending on what a state wants to do.

Federal Regulations Do Affect Maryland

The federal government has no rules on golf cart use beyond the fact that they cannot be used on federal or international highways.

They let state and local authorities decide how they want to use carts in their area.

They do, however, have some rules and regulations for low-speed vehicles, which include any manufactured to ride above 20 miles per hour but lower than 25 miles per hour.

As a result, you must make sure that you talk to your state officials about these regulations to see how they apply to you.

While golf carts and low-speed vehicles are not allowed on federal or international highways, state and local rules may differ.

Read on to find out where you can ride golf carts and low-speed vehicles in Maryland to make sure that you follow all proper regulations.

Maryland State Laws Vary in Many Ways

Currently, Maryland does not allow golf carts to travel on public roads.

This law applies to every city in the state, except for Crisfield.

Here, you can ride golf carts on city streets, including state and county roads within the borders of the town.

Some roads may be off-limits, though, so pay attention to these factors if you visit this city.

However, other cities may have limited

circumstances in which carts can be on roads.

For example, the state allows golf carts in all cities to briefly cross a public street in very limited circumstances.

These include if the cart is traveling from one road on a golf course to another.

No other cart use is tolerated except, perhaps, for driving a golf cart from non-golf-course private land to another type of private land.

This use has not been defined by the state, so make sure to talk to authorities near you to make sure you can do this if you want to try it.

However, Maryland does follow federal regulations for low-speed vehicle transportation.

And since you can upgrade a cart to be a low-speed vehicle, they can technically be used as one.

However, you need to follow all guidelines and rules to make sure that you do everything legally.

Please note: Maryland also has rules for medium-speed vehicles.

These vehicles can travel on any road that has a speed limit that is at least five miles per hour over their maximum speed.

Maryland's Definition of Low-Speed Vehicles

Maryland currently follows the rules and guidelines in place by the federal government.

As a result, you need to upgrade your cart to make it road-ready for many different situations.

These include adding headlights, taillights, turn signals, parking brakes, reflex reflectors, rearview mirrors, windshields, seat belts, stop lights, and getting a vehicle identification number or VIN for your cart.

Please note: golf carts that do not qualify for low-speed vehicle status do not need this kind of registration.

Though use of golf carts on roads is limited in Maryland, as mentioned before, there are some areas where it may be legal.

Again, always stay in touch with your local authorities to know for certain whether or not golf cart use is okay in your part of the state.

All riders of low-speed vehicles (but not golf carts) also need a valid driver's license.

People without one cannot drive a cart but can ride on one driven by a person with a license.

All low-speed vehicles must also be licensed after getting registered.

Before you do this, though, you need to get a VIN for your cart at a local DMV office near you.

At this point, a DMV official will check your cart's safety upgrades.

They will also make sure that the cart weighs less than 3,000 pounds and that it can reach speeds of 20 miles per hour but no more than 25 miles per hour.

Once they are satisfied that you have met these requirements, they will give you a VIN.

Now, you can register and license your vehicle.

Display your license on the cart when on the road.

Helpful Tips

Unleash Your Carts Potential With These Parts & Accessories

Are you a golf cart enthusiast looking to upgrade your ride? Whether you're a passionate golfer or enjoy cruising around in your golf cart for leisure, it's always exciting to personalize and improve your cart's performance. From enhancing its functionality with high-quality parts to adding a touch of style with attractive covers, there are plenty of options to take your golf cart to the next level.

Golf cart parts are essential for maintaining and optimizing the performance of your vehicle. Whether you're looking to enhance speed, increase power, improve handling, or add practical features, investing in top-quality parts can make a significant difference in your overall golf cart experience.

When it comes to upgrading your golf cart, there are several key areas to consider:

Batteries:

Upgrading to high-performance batteries can provide increased range and power for your golf cart. Consider options such as lithium-ion or AGM batteries for improved performance and durability.

Motor Upgrade:

Installing a high-performance motor can significantly enhance your golf cart's speed and acceleration. Upgrading to a more powerful motor can transform your leisurely rides into thrilling adventures.

Suspension:

Upgrading your golf cart's suspension system can greatly improve its stability and ride comfort. Look for options that offer adjustable settings to suit different terrains and preferences.

Lighting and Accessories:

Adding LED lights, turn signals, and other accessories can enhance both the safety and appearance of your golf cart. Consider installing a rearview

mirror, a horn, or a stereo system to further personalize your ride.

By investing in high-quality golf cart parts, you can unlock the full potential of your cart and enjoy an elevated golfing or cruising experience.

Golf Cart Covers:

Protect and Personalize Your Ride

In addition to upgrading your golf cart's performance, it's also important to protect and personalize its appearance. Golf cart covers offer an excellent solution for keeping your cart in pristine condition while adding a touch of style.

Here are some key reasons why golf cart covers are a must-have accessory:

Protection from the Elements:

Golf cart covers provide protection against the sun's harmful UV rays, rain, dust, and other environmental elements. By shielding your cart from these factors, you can prevent fading, rusting, and other forms of damage.

Preserve Upholstery:

A high-quality golf cart cover helps protect your seats and interior from wear and tear. It prevents dirt, stains, and spills from damaging your upholstery, ensuring that your seats remain

comfortable and looking new.

Security:

Golf cart covers act as a deterrent against theft and vandalism. By covering your cart when not in use, you reduce the visibility of valuable items inside and make it less appealing to potential thieves.

Style and Customization:

Golf cart covers come in a wide variety of colors, patterns, and designs, allowing you to personalize your cart's appearance. Whether you prefer a classic, sporty, or vibrant look, there's a cover to match your style.

Investing in a high-quality golf cart cover will not only protect your investment but also add a touch of personality to your ride. It's a simple and effective way to keep your cart looking great for years to come.

Find the Perfect Golf Cart Parts and Covers

Now that you understand the importance of golf cart parts and covers, it's time to explore your options and find the perfect ones for your cart. To get started, consider visiting trusted online retailers or local golf cart dealerships that specialize in golf cart accessories.

For top-quality golf cart parts, look for manufacturers known for their durability and performance. Read customer reviews, check product

specifications, and consult with experts to ensure you make the right choices for your specific needs.

When it comes to golf cart covers, seek out reputable brands that offer a wide range of options. Look for covers made from durable and weather-resistant materials, and choose designs that reflect your personal style and preferences.

Remember, investing in high-quality golf cart parts and covers is an investment in the longevity, performance, and aesthetics of your golf cart. So, start exploring your options today and take your golf cart to new heights of excellence and style.

AROUND *the* INDUSTRY

CLUB CAR

CLUB CAR DONATES GOLF CARTS TO SUPPORT LOCAL SCOUTING PROGRAMS

Club Car®, a global leader in golf, personal transportation, and utility vehicles, has donated five golf carts to the Georgia-Carolina Council, Scouting America, to aid camp operations and community programs.

Four of the vehicles will be used at the Robert E. Knox Scout Reservation, where they will help streamline transportation for Scouts and staff, according to a press release from the Georgia-Carolina Council.

One cart will be designated as a medical response vehicle for the Doctors Hospital Health Lodge, enhancing emergency support on site.

The fifth cart will serve the Nature & Adventure Center, supporting STEAM School field

trips with Richmond and Columbia County Schools. It will also be available for various Scout programs, offering accessibility for mobility-challenged students. Photo courtesy of Scouting America's Georgia-Carolina Council.

"We are incredibly grateful to Club Car for their generous donation," said Scout Executive of the Georgia-Carolina Council Daniel Rogers. "These golf carts will enhance our ability to deliver impactful Scouting programs and ensure that all participants, including those with mobility challenges, can fully engage in our activities."

Global Director of Validation and Prototype at Club Car Brandon Jaremski emphasized how providing the golf carts will allow scouts and visitors to explore, learn, and grow in the outdoors.

CLUB CAR - CONTINUED

"We are proud to support the community and help make camp programs more accessible and engaging for everyone," said Jaremski.

The Georgia-Carolina Council serves thousands of youth across Georgia and South Carolina through outdoor adventures and service opportunities. Club Car, headquartered in Augusta, has been an industry leader in small-wheel vehicles for more than 60 years.

WHISPER CARTS LLC - ACQUIRES LANDMASTER UTV

WHISPER CARTS LLC ACQUIRES AMERICAN LANDMASTER UTVS, SUPERCHARGING BRAND WITH CUTTING-EDGE INNOVATION AND AMERICAN-MADE EXCELLENCE

Johnson City, TN – October 10, 2025 – Whisper Carts LLC (whisperev.com), a Tennessee-based titan in luxury electric golf carts, celebrated for its meteoric growth, bold styling, and world-class engineering, today announced its acquisition of American Landmaster UTVs (landmaster.com), a leading Indiana manufacturer of rugged, American-made utility terrain vehicles (UTVs). This transformative acquisition elevates American Landmaster to new heights, blending Whisper's state-of-the-art technology and manufacturing prowess with Landmaster's legacy of durable, work-ready UTVs to create a powerhouse in the premium mobility sector.

Whisper Carts has redefined the golf cart industry with its iconic Whisper Halo and G4 series, combining stunning design with eco-friendly performance. Leading this charge is Founder and CEO Dave Hatley, a vision-

ary who transformed a backyard pool and spa business into LPI, Inc., America's largest hot tub manufacturer and the world's second-largest retailer, with 91 locations and over 700 employees. Hatley also turned around a struggling Tennessee ski slope into the thriving Hatley Pointe resort. Now, his proven expertise and relentless innovation are set to enhance American Landmaster, delivering advanced, American-made UTVs that compete aggressively with Chinese imports while maintaining affordability and premium quality.

As part of this enhancement, American Landmaster's production will transition from Columbia City, Indiana, to Whisper's cutting-edge Tennessee facility, unlocking superior efficiency, innovative designs, and sustainable manufacturing. The American Landmaster brand will shine brighter than ever, supported by its dedicated network of over 200 U.S. dealers, ensuring seamless service and an upgraded product lineup that promises greater profitability and customer excitement.

WHISPER CARTS LLC - ACQUIRES LANDMASTER UTV

"American Landmaster is about to soar to new levels with Whisper Carts' resources behind it," said Dave Hatley. "Our shared commitment to American-made quality and innovation will enhance Landmaster's rugged UTVs, delivering unmatched performance and value. This is an advancement that will redefine what dealers and customers expect from the brand."

Jeff Brockman, Vice President of Sales at American Landmaster UTVs, added, "Under Dave Hatley's leadership, we're not just continuing our legacy—we're advancing it. His

track record of building industry-leading, affordable products gives our dealers and customers a renewed sense of confidence and opportunity. With Whisper's technology, American Landmaster will deliver a more dynamic, business-friendly product lineup that's built to dominate."

The acquisition will close in the coming weeks, subject to regulatory approvals. Whisper is committed to a seamless transition, supporting Indiana employees with job placement and relocation opportunities. Financial terms were not disclosed.

About Whisper Carts LLC

Whisper Carts LLC (whisperev.com) is a Tennessee-based leader in luxury electric golf carts, known for its explosive growth, modern styling, and engineering excellence. With iconic models like the Whisper Halo and G4, Whisper sets the industry standard for premium, eco-friendly mobility.

About American Landmaster UTVs

American Landmaster UTVs (landmaster.com) produces mid-sized, American-made UTVs, including the all-electric AMP, for work, hunting, and adventure. Built with durability and domestic sourcing, the brand serves customers through a nationwide dealer network.

SIMOLO CUSTOMS

ALBION GOLF CARS JOINS THE SIMOLO CUSTOMS DEALER NETWORK

We're excited to announce that Albion Golf Cars, one of Ontario's most respected names in golf and low-speed electric vehicles, has officially joined the Simolo Customs dealer network.

For over four decades, Albion has built a strong reputation as a premier supplier of golf, utility, and transport vehicles, serving a wide range of clients across Ontario — from golf courses and resorts to commercial and residential communities. Their dedication to customer service,

deep product knowledge, and commitment to quality perfectly align with Simolo Customs' own values and standards.

This partnership marks a major step forward for Simolo Customs as we continue to grow our select network of premium Canadian dealers. Rather than expanding rapidly, we're focused on working with a small number of carefully chosen partners who share our passion for craftsmanship, reliability, and innovation. Albion Golf Cars embodies that philosophy.

Through this collaboration, the people of Ontario will

now have direct access to Simolo Customs' full line of Transport Canada-compliant Lifestyle Vehicles, built right here in British Columbia. From resort and golf applications to personal and commercial use, these vehicles redefine what a low-speed vehicle can be — combining modern design, Canadian manufacturing, and cutting-edge technology.

We're thrilled to welcome the entire Albion team to the SC Family, and we look forward to seeing more Simolo Customs vehicles on the roads and fairways of Ontario very soon. Welcome to the team, Albion Golf Cars!

NATIONAL POWERSPORT AUCTIONS

NATIONAL POWERSPORT AUCTIONS JOINS LSVDA AS FOUNDING PLATINUM PARTNER TO SUPPORT DEALER GROWTH

POWAY, Calif., October 28, 2025 — National Powersport Auctions (NPA), the nation's leading provider of powersport and specialty vehicle remarketing services, has joined the Low Speed Vehicle Dealer Association (LSVDA) as a Founding Platinum Partner. This collaboration strengthens the commitment

of both organizations to advance dealer success, promote safety, and grow the national market for low-speed, golf cars, personal transportation and commercial cargo vehicles.

With over 35 years of experience and 10 locations nationwide, NPA continues to drive innovation and growth across the powersports and low-speed vehicle industries. A trusted wholesale partner for fleet and consumer vehicles, NPA provides dealers, OEMs, and financial institutions with a full range of auction, remarketing, and business solutions to maximize profits and streamline operations.

"We're excited to partner with LSVDA and help shape the future of the low-speed vehicle industry," said Tony Altieri, Vice President of Business Development at NPA. "As the market continues to expand, we're committed to providing dealers with the tools, access, and opportunities they need to thrive."

"We're thrilled to welcome NPA as a Founding Platinum Sponsor," said Mike Alexander, Executive Director of LSVDA. "Their leadership in remarketing and deep dealer relationships strengthen our shared mission of building a safer, more profitable, and well-connected dealer community nationwide."

Through its partnership with LSVDA, NPA is offering all LSVDA members a free one-year new NPA membership, including up to \$300 in buyer fee credits on their first purchase. This exclusive offer is available through July 31, 2026. For full details, visit npauctions.com/cp/npa-promotions.

The partnership reinforces LSVDA's commitment to deliver measurable value to its dealer members, providing access to trusted wholesale resources, business tools, and growth opportunities while uniting a collective industry voice dedicated to advocacy, education, and safety.

About National Powersport Auctions (NPA)

Established in 1990, National Powersport Auctions (NPA) is one of the world's

leading providers of powersport vehicle remarketing services. NPA's nationwide footprint serves the industry's largest financial institutions, manufacturers, and dealers through their premier live and online selling platforms. NPA offers comprehensive data services, including the NPA Value Guide™, the industry's most accurate wholesale valuation tool. NPA is a wholly-owned subsidiary of Copart, Inc. (Nasdaq: CPRT). For more information, visit www.npauctions.com.

About the Low Speed Vehicle Dealers Association (LSVDA)

The Low Speed Vehicle Dealers Association (LSVDA) unites and advocates for golf car and low-

speed vehicle dealers, suppliers, and partners across North America. Founded to strengthen dealer profitability, safety standards, and public policy representation, LSVDA promotes responsible growth, education, and collaboration within this fast-evolving mobility sector. Learn more at www.lsvda.com.

MARKET REPORT

INDIA GOLF CARTS MARKET FORECASTED TO EXPAND FROM US\$2.2 BILLION IN 2025 TO US\$3.1 BILLION BY 2032 AT 5.0% CAGR

The India golf carts market is witnessing significant growth, driven by the increasing demand for eco-friendly mobility solutions in tourism, hospitality, and luxury real estate sectors. According to Persistence Market Research, the market is projected to reach US\$2.2 Billion in 2025 and expand to US\$3.1 Billion by 2032.

Key Highlights from the Report

The India golf carts market is projected to grow from US\$2.2 Billion in 2025 to US\$3.1

Billion in 2032, reflecting a 5.0% CAGR. Electric golf carts are the leading product segment due to increasing environmental awareness and cost efficiency. Expansion of tourism and hospitality sectors is a key driver for market growth. High adoption in luxury residential projects and gated communities enhances market demand. Northern and Western regions of India are leading markets due to concentration of premium hotels and resorts. Government support for sustainable mobility solutions is fostering investments in golf cart infrastructure.

GOLF CART FARM

EXCITING NEWS FROM THE GOLF CART FARM!

I'm thrilled to announce that The Golf Cart Farm has officially acquired GolfCart-Garage.com — one of the most trusted and recognized names in online golf cart parts and accessories.

This is a huge milestone in our company's growth and a powerful step toward our mission of making high-quality golf carts, lithium upgrades, and parts more accessible nationwide.

Here's what this means:

- 4x increase in online reach and market share
- Proven e-commerce infrastructure and digital presence

- Established relationships with Fortune 500 corporate accounts
- A stronger team and shared commitment to customer care

Since 2014, Golf Cart Garage has fulfilled over 180,000 orders and earned its reputation as a go-to source for golf cart parts and accessories. Together, we'll build on that trust — combining The Golf Cart Farm's wholesale, retail, and lithium expertise with Golf Cart Garage's nationwide digital reach.

We're excited for this next chapter and grateful for everyone who's helped make it possible. The best is yet to come.

— Andrew Kephart
President | The Golf Cart Farm

ABOUT US:

Founded in 2019 by Andrew Kephart as a garage side hustle, The Golf Cart Farm has quickly grown into a thriving retail and wholesale operation—and one of the largest golf cart providers in the country. We couldn't have done it without our amazing team and the trust and support of our incredible customers.

Whether you're a retiree ready to cruise the neighborhood, a business needing a full fleet, or just someone who wants to upgrade to a lithium-powered ride—we've got you covered.

THE GOLF CART FARM

The Golf Cart Farm is located in Mesa, Arizona (3015 E Main St), but they proudly serve customers nationwide. With a 5-star Google rating and thousands of happy buyers. The Golf Cart Farm works hard every day to deliver the kind of service you'll actually tell your friends about.

Our facility holds over 2,400 golf carts, and we proudly distribute for both Club Car and E-Z-GO.

NATIONWIDE SHIPPING ON ALL GOLF CARTS! FREE SHIPPING ON ALL LITHIUM BATTERIES!

Please contact The Golf Cart Farm directly with any questions at (480) 568-2493 or e-mail Andrew@TheGolfCartFarm.com. www.TheGolfCartFarm.com.

LESTER ELECTRICAL

LESTER ELECTRICAL JOINS LSVDA AS FOUNDING MEMBER SUPPLIER PARTNER

Lincoln, NE / Sarasota, FL — We are pleased to announce that Lester Electrical (Lincoln, Nebraska) has officially joined the Low Speed Vehicle Dealer Association (LSVDA) as a Founding Member

Supplier Partner. Founded in 1963 in Lincoln, Nebraska, Lester Electrical has

built its reputation designing and manufacturing industrial battery chargers and electrical power-conversion and storage solutions.

Prior to joining, Lester Electrical sponsored a complimentary charger giveaway during LSVDA's appearance at

the Golf Carting Expo, underscoring their commitment to the low-speed vehicle market and to the dealer community. Dealers at the event responded enthusiastically, and the positive energy and strong engagement validated the decision for both parties to collaborate.

"Our team recognized the tremendous opportunity, and the enthusiasm dealers bring to servicing this market. Partnering with LSVDA and sponsoring the charger giveaway allowed us to see firsthand the positive response and the value dealers place on "Made in America" quality solutions," said Spencer Stock, President & CEO of Lester Electrical.

Lester will publish white papers and host an on-line webinar addressing technologies and safety best practices for vehicle charging. Given

their strong engineering and experience, they have been nominated to serve on the Policy and Safety Committee to ensure new standards and regulations appropriately address safety concerns. And, in collaboration with LSVDA, develop new product opportunities and priority access for top tier member dealers.

This partnership marks an exciting step forward for all parties and sets the stage for deeper collaboration, innovation and value creation in the low-speed-vehicle and golf-car dealer community. "We're thrilled to welcome Lester Electrical as our newest Supplier Partner. Their leadership in battery-charger innovation and their Made in America" focus demonstrates a genuine commitment to our members. Their support strengthens our mission and brings high-value solutions to

LESTER ELECTRICAL

our network,” said Mike Alexander, Executive Director and Secretary of LSVDA.

For more information about Lester Electrical or LSVDA, please contact:

Lester Electrical: Jill Aerni at jilla@lesterelectrical.com

LSVDA: Mike Alexander at michael@LSVDA.com

About Lester Electrical

Founded in 1963 and headquartered in Lincoln,

Nebraska, Lester Electrical is a global leader in the design and manufacture of industrial/commercial battery chargers and electrical

power-conversion and storage solutions. With over 60 years of experience, Lester’s products serve a wide range of applications including motive-power vehicles, stationary power systems, and custom power-electronics solutions.

About LSVDA

The Low Speed Vehicle Dealer Association (LSVDA) represents dealer members specializing in low-speed

vehicles, golf carts, personal-transportation EVs and related mobility solutions. Through partnerships, education, advocacy and product-supplier relationships the association supports dealers in growing their businesses, staying competitive and delivering value to end customers.

KINETIC GREEN

KINETIC GREEN TONINO LAMBORGHINI EXPANDS GLOBAL FOOTPRINT WITH MALDIVES FORAY

Kinetic Green Tonino Lamborghini Pvt Ltd is proud to announce the appointment of Electrify Maldives Pvt Ltd as the exclusive dealer for their electric golf and lifestyle carts in the Maldives. This strategic move stems from a distribution agreement between Trade Promoters Pvt. Ltd. Sri Lanka (TPL) and Kinetic Green Tonino Lamborghini Pvt Ltd, marking a significant milestone in expanding premium electric mobility across global leisure destinations.

Electrify Maldives Pvt Ltd, the Title Sponsor of TechEng 2025 powered by Tonino Lamborghini Golf Carts which is the Maldives’ premier exhibition for engineering and technology in hospitality and infrastructure, unveiled the electric luxury golf & lifestyle carts on October 28.

These luxury electric golf and lifestyle carts are offered in two distinct product lines i.e the Genesis Range, featuring chic Italian design inspired by the brand’s legacy and the Prestige Range, which embodies futuristic, ultra-premium styling. Available in 2-, 4-, 6- and 8-seater configurations, these models are designed for versatile use across golf courses, luxury resorts, private estates, airports and corporate campuses. Engineered for performance and comfort, they feature a tailored MacPherson suspension, four-wheel hydraulic brakes, 45 Nm torque and 30% gradeability, ensuring both safety and power. An advanced lithium-ion battery with wireless charging offers a 10-year life and a range of up to 150 km, backed by a 5-year warranty. Inside, luxury ergonomics include premium seating, ample legroom and intuitive controls, complemented by universal LHD/RHD compatibility.

ECO BATTERY

ECO BATTERY MAKES SIGNIFICANT INVESTMENT IN ACCULON ENERGY

Eco Battery, the leading provider of high-performance lithium battery solutions for Low-Speed Electric Vehicle (LSEV) markets, today announced a significant investment in Acculon Energy. This Columbus, Ohio-based company designs, tests, and develops advanced lithium and sodium-ion battery systems for a broad range of applications.

This investment marks a pivotal step in Eco Battery's mission to serve North America with the best commercial and industrial battery products. By integrating Acculon's innovative lithium and sodium-ion products and its commitment to domestic manufacturing, the partnership is poised to deliver breakthrough battery solutions for a range of market segments, from critical power applications for data centers to material handling equipment.

"Acculon's deep technical expertise and plans to expand their U.S. manufacturing footprint make them a natural fit for our long-term vision," said Skylar Schone, CEO at Eco Battery. "We're particularly excited about their

industry-leading engineering team and vertically integrated business model, which can promote innovation across a shared product roadmap."

Andrew Thomas, Acculon's President, adds, "Joining Eco Battery opens up incredible opportunities for scale and impact. With Eco Battery's reputation as the preferred lithium battery for LSEVs and its strong financial backing, both businesses are well-positioned for continued expansion. The importance of "Made and Supported in the U.S.A" has never been greater for our customers."

Eco Battery's investment in Acculon Energy comes at a critical time for the U.S. battery industry. The demand for advanced energy storage systems is growing exponentially, and a robust domestic manufacturing base and supply chain are essential to meet this growing demand. Together, these two battery powerhouses will leverage the strengths of their teams to drive innovation, quality, safety, and customer satisfaction across the entire electrification ecosystem, redefining what's possible in energy storage and battery system manufacturing.

About Eco Battery
Eco Battery, the U.S.-based leader in lithium power solutions, is dedicated to transforming the industry with innovative, safe, and reliable

technology. Its in-house engineering, R&D, and product development teams deliver top-quality lithium solutions, supported by expert integration and exceptional dealer service. Trusted by leading golf cart manufacturers and elite dealers, Eco Battery is the go-to choice for uncompromising performance. Committed to a future driven by its mission and guided by the north stars of elite innovation and customer obsession, Eco Battery continues to set the standard in lithium power. For more information, visit <https://ecobattery.com/>

About Acculon Energy
Acculon Energy designs and manufactures advanced battery modules and packs—specializing in sodium and lithium chemistries—for commercial and industrial applications from data centers to heavy equipment. Based in Columbus, OH, Acculon brings decades of energy storage expertise to deliver safe, scalable, and efficient solutions that go beyond UL safety standards. For more information, visit <https://acculonenergy.com/> or <https://www.linkedin.com/company/acculon-energy/>

TROJAN BATTERY

TROJAN BATTERY COMPANY WINS AGIF AWARD FOR EXCELLENCE IN INNOVATION

Trojan Battery Company, the global innovator in battery technology for a century, has picked up a coveted award at the inaugural Asian Golf Industry Federation (AGIF) Awards.

The Trojan Lithium OnePack Battery Pack family, which redefines performance standards for

powering golf carts and low-speed electric vehicles (LSEVs), earned the top honor in the Excellence in Innovation category, clearly establishing the family as a premier solution for any golf cart application.

The AGIF Awards recognize excellence, innovation, and leadership in the Asian golf industry. In earning the Excellence in Innovation award, Trojan's commitment to raising the standard in golf battery technology continues to be acknowledged. The OnePack family extends range, improves reliability, and expands connectivity – key features transforming the golf cart market worldwide.

“Earning the AGIF Award for Excellence in Innovation clearly demonstrates Trojan's commitment to advancing innovation in the global market,” said Jon Anderson, Trojan Battery's Chief Technology Officer. “The Excellence in Innovation Award highlights Trojan's ongoing achievements in raising golf battery technology standards”

The Trojan OnePack range – the standard 48V 105Ah, Extended Range (XR) 48V 171Ah, and High Performance 51.2V 171Ah – was developed to meet the industry demand for high-performance, low-maintenance, and

connected energy solutions. Each battery pack features advanced technology with Bluetooth integration, enabling real-time monitoring through the Trojan SmartBattery App to give users complete control and peace of mind.

Designed as easy drop-in replacements, the OnePack battery packs offer:

- **Extended Range** – up to 75 miles on a single charge, exceeding industry benchmarks.
- **Superior Power and Efficiency** – delivers faster acceleration and maintains 26% more charge, even at maximum range.
- **Rapid and Opportunity Charging** – reduces downtime and optimizes performance, on and off the course.
- **Long-Term Value** – backed by a 10-year warranty and engineered for a life of up to a decade, for lower total cost of ownership (TCO).
- **Advanced Safety** – built with four layers of redundant protection for maximum safety.

LSVDA

DRIVING FORWARD WITH LSVDA - MICHAEL ALEXANDER

Golf Carting Expo 2025. The [LSVDA](#) team had an amazing time connecting with dealers, suppliers, and industry partners from across the country. For a first-year event, the turnout was outstanding, a true reflection of the growth, enthusiasm, and unity within the low-speed vehicle community.

Events like this remind us why we're here: to strengthen dealer relationships, elevate industry standards, and drive the future of low-speed mobility together.

We had three outstanding supporters at the show. It started Thursday with author Dino Dakuras, former consumer and commercial regional dealer manager and strategic account leader for Club Car, signing his new book, "A Legacy Left Behind: A Father's Guide to Life and Business". In the book he recounts dozens of lessons learned from his dad, Billy "the Greek" Dakuras. Seeing Dino took me back to 1984. The year I hired Billy to join my Sales Engineering team. The book is a great read and you can get your cope [HERE](#).

[Jeffrey Allen Inc.](#), a Platinum

Level Dealer Member is a premier authorized golf car dealer for [Club Car](#), as well as [other leading golf cart brands](#). They specialize in golf car sales, service, parts, accessories and rentals and serve customers throughout Central and South Florida with showrooms in Tampa, Orlando and Ft. Lauderdale (Davie). They are also a battery distributor. Jeffrey Allen's president, Ben Sverdlow was gracious enough to offer a free giveaway for new LSVDA members signing up at the show.

Ozzie Hughes, from [Kelly's Custom Carts](#) in Ft. Ann, NY won the random drawing of the Bolt Energy USA Battery Giveaway. After receiving the news Ozzie reached out and said "Thank you so much for this amazing prize!!! Chris, Earle and I really enjoyed our time with you at the expo. As we move forward with more and more LSV's it's great to know there is support for us dealers. This premium LiFe-PO4 lithium battery system (valued at over \$3,000 retail!) will power one of our upcoming custom builds — showcasing the latest in performance, range, and reliability for our customers here in the Lake George and Upstate NY region."

I ran into Jill Aerni, Director of Sales and Marketing, [Lester Electrical](#) at the Networking event Wednesday evening. She saw the action at the LS-

VDA booth Thursday morning and after a chat, she decided to offer a giveaway of their brand new, Made in America charger system, the TT 650. By noon, the signage was in place at our booth.

We are pleased to announce that Jenny Starnes of [Grove Motor South](#) won the Lester Charger Giveaway. Grove Motor South offers a full suite of golf carts, low-speed vehicle (LSV) conversions, and electric mobility solutions. The business emphasizes new electric vehicle models, used carts, lithium battery upgrades, and street-legal LSV conversion services. The team, including Jenny Starnes, is known for outstanding customer service and technical expertise when it comes to high-performance and eco-friendly carts. Their mission: "eco-friendly, high-performance transportation solutions with unmatched customer service."

A huge thank-you to Golf Carting Magazine for hosting such a successful event, and to all the exhibitors, sponsors, and attendees who made it possible. From innovative products to insightful conversations, the energy was electric, and we're already looking forward to next year's summit!
